POWERED BY

ACD SEAMLESS
RFID
INTEGRATIONS

A SaaS web platform for managing
software licenses across multiple tenants

What is Licence Manager

License Manager is a multitenant SaaS web platform developed by ACD for the centralized management of software licenses. Designed for resellers and integrators, it enables simple and secure activation, monitoring, and administration of licenses from any vendor, offering tenant-level visibility, flexible licensing models, and full automation of the license lifecycle from code generation to activation, renewal, and expiration.

Key Features

1

Centralized management

Allows resellers to manage all clients and licenses in one platform, with isolated environments for secure, scalable operations.

2

Automatic license activation

Secure code generation automates and accelerates software activation, reducing errors and onboarding time.

3

The highest level of flexibility

Licenses work offline or online via API, with an SDK for easy integration into third-party apps.

4

Monitoring and notifications

Real-time monitoring and alerts with automatic client updates ensure full control over license status.

5

Access control and user roles

Granular access controls ensure secure, traceable license management with reduced risk of errors.

6

Secure APIs for automation

Secure APIs integrate with external apps to automate license issuance, updates, and revocations reliably.

7

Comprehensive reporting and auditing

Tracked operations and customizable reports ensure complete visibility and powerful tools for analysis and auditing.

Advantages and Benefits

License Manager automates license lifecycles with intuitive control, unlimited scalability, and strong security.

Total automation

Expirations, renewals, and activations managed autonomously by the system.

Ease of use

Intuitive interface and clear workflows, even for non-technical users.

Smart control

Accurate tracking of sold licenses and their lifecycle.

Scalability

Ability to manage unlimited software and end customers.

Reliability

Data security and protection against misuse or license duplication.

Why Licence Manager

License Manager is the ideal solution for software resellers or integrators who want centralized, secure, and automated control, capable of reducing operational costs and simplifying relationships with their end customers.

Several companies already use it daily to efficiently manage thousands of software licenses distributed to clients and partners.
